

System Engineer

Quallion, LLC has the broadest and deepest understanding of lithium ion chemistry and has a long history as a primary and rechargeable cell battery manufacturer for use in the medical, military and aerospace industries. Quallion is where science and engineering are advancing battery technologies, broadening design options and delivering power solutions that enable unique and challenging applications.

Summary:

The System Engineer is responsible for system architecture for new and existing product design. This role will work with mechanical, electrical, software and battery engineering to determine the implementation for new products.

Responsibilities:

- Analyzes and reviews customer specification to ensure design meets the specified requirements.
- Works with production, quality and process engineering to understand, analyze and resolve questions concerning overall product design.
- Analyzes customer requirements to develop concepts and presentations in support of customer communication.
- Works with new product development teams to ensure products to meet specifications.
- Works with design team to follow system architecture decision through to implementation to verify initial decisions and assumptions were correct.
- Responsible for the system product specification, verification that it meets customer requirements and that it was properly implemented in the final design.
- Other duties as assigned.

Qualifications:

- B.S. Degree (Science or Engineering) or equivalent in related field.
- Minimum 5+ years experience in a design or manufacturing environment
- Background in ISO9000 and/or AS9100
- Proficient in Microsoft Office Tools
- Ability to interact with diverse work force
- Ability to work in a fast paced and challenging environment
- Ability to multi-task
- Ability to solve practical problems and deal with a variety of concrete variables in situations where only limited standardization exists.

To apply for this position:

Qualified candidates should send resume to Quallion LLC, attention Human Resources, hr@quallion.com and include “**System Engineer - Department 51**” in subject line of the e-mail to be considered.
